A LEGEND REBORN. FULLY ELECTRIC.

INDEPENDENT DESIGN STUDY
NOT AFFILIATED WITH DE TOMASO AUTOMOBILI

FOREWORD

The De Tomaso Pantera has always represented far more than performance.

It was a statement of Italian passion, sculptural design and mechanical emotion.

The Pantera EV is not an attempt to recreate the past.

It is a respectful evolution of an icon.

Every surface has been redesigned with purpose, preserving the unmistakable proportions and character that defined the original while embracing a new era of electric performance.

Silence replaces combustion.

Precision replaces excess.

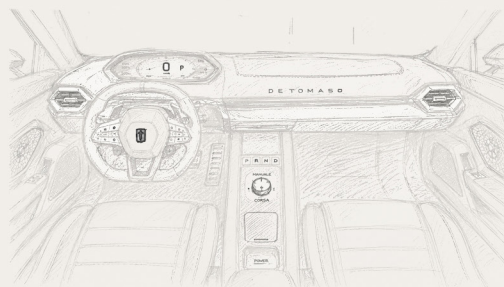

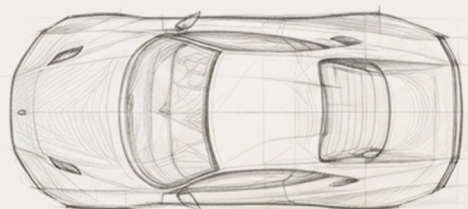

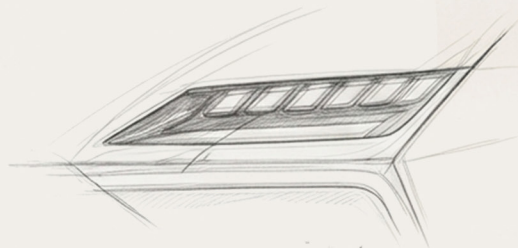

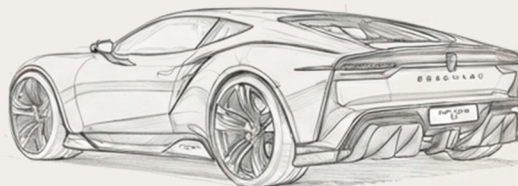

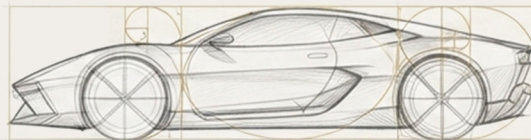

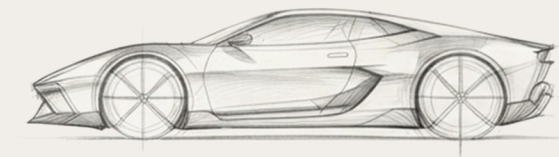

Technology enhances emotion rather than replacing it.

This concept imagines how De Tomaso could reinterpret one of its greatest legends without compromising its identity.

Not as a tribute.

But as the next chapter.

THE CREATIVE PROCESS

**TECHNOLOGY ACCELERATES CREATIVITY.
IT NEVER REPLACES IMAGINATION.**

Some icons are not meant to be replaced.
They are meant to be reinterpreted.

DE TOMASO PANTERA
1971

A revolutionary fusion of
Italian design and American power.
Bold. Exotic. Uncompromising.
An icon was born.

50+ YEARS

1971

2026

The original De Tomaso Pantera represented the perfect meeting between Italian design and uncompromising performance. More than fifty years later, this concept explores how that same philosophy could evolve into the electric era without losing the emotion, the sculpture and the presence that made the Pantera unforgettable.

PANTERA EV CONCEPT
2026

A new expression.
Same soul.
Electric by nature.
Pantera by DNA.

DESIGN PHILOSOPHY

DESIGNED AS SCULPTURE.
ENGINEERED FOR EMOTION.

Every great automobile begins with a proportion, not a specification.

The Pantera EV was never imagined as an electric vehicle first. It was imagined as an emotional object.

Every surface was refined to remove visual noise. Every line was questioned. Every volume exists with purpose.

Instead of adding complexity, the design embraces clarity, tension and timeless proportions.

The objective was simple:

CREATE A CAR THAT FEELS INEVITABLE

A modern Pantera should not imitate the past. It should capture its confidence.

PURITY

Less lines. More sculpture.

EMOTION

Technology must never replace character.

TIMELESSNESS

A design that remains desirable beyond trends.

EXTERIOR DESIGN

MODERN SCULPTURE SHAPED BY HERITAGE

AERODYNAMIC CLARITY
THROUGH PURPOSEFUL
SIMPLICITY

ICONIC PRESENCE
REINTERPRETED
FOR THE FUTURE

The Pantera EV was conceived to preserve the emotional presence of the original while embracing the opportunities offered by an electric architecture.

Every surface was refined to balance aerodynamic efficiency with visual tension.

The result is a silhouette that feels unmistakably Italian confident, sculptural and timeless.

FASTBACK PROFILE
FOR A TIMELESS SILHOUETTE

SCULPTED SURFACES
DEFINED BY LIGHT
AND SHADOW

PRESENCE

PRECISION

PROPORTION

PURITY

INTERIOR DESIGN

EVERY DETAIL EXISTS FOR THE DRIVER

Rather than overwhelming the driver with technology, the Pantera EV interior focuses on clarity, craftsmanship and emotional connection.

Premium materials, precise ergonomics and restrained digital integration create an environment where every journey feels intentional.

The cockpit is not simply a place to operate a vehicle. It is the space where driver and machine become one.

DRIVER FOCUS

CRAFTSMANSHIP

MINIMALISM

EMOTION

SCULPTING THE SILHOUETTE

EVERY LINE SERVES BOTH BEAUTY AND PURPOSE

FRONT OVERHANG
Compact proportions
inspired by the original
Pantera.

CAR FORWARD LAYOUT
Electric packaging
allowing a more
dynamic stance.

FLOATING ROOFLINE
A continuous arc improving
elegance and aerodynamic
flow.

MUSCULAR REAR SHOULDER
A visual expression of power
transferred to the rear axle.

**INTEGRATED
ACTIVE SPOILER**
Invisible at rest.
Functional at speed.

THE STRONGEST DESIGNS ARE UNDERSTOOD
BEFORE THEY ARE EXPLAINED.

AERODYNAMIC INTELLIGENCE

INVISIBLE ENGINEERING SHAPING VISIBLE BEAUTY

**CLOSED FRONT
ARCHITECTURE**
Cleaner airflow and improved
efficiency.

**FUNCTIONAL SIDE
INTAKES**
Cooling only where needed.

ACTIVE REAR SPOILER
Deploys only at higher
speeds.

FLAT FLOOR
Reduced turbulence
underneath the vehicle.

REAR DIFFUSER
Maximises stability while
preserving elegance.

DESIGN NOTE

Every aerodynamic solution was designed to disappear into the sculpture, ensuring performance never compromised elegance.

TRUE AERODYNAMICS SHOULD BE FELT
BEFORE THEY ARE SEEN.

MATERIALS & CRAFTMANSHIP

CRAFTED WITH PURPOSE. FINISHED WITH EMOTION.

Every material inside the Pantera EV was selected to create a lasting emotional connection between driver and machine.

Rather than chasing excess, the interior celebrates precision, restraint and tactile quality.

ALCANTARA	Softness without distraction.
CARBON FIBRE	Lightness with structural purpose.
MACHINED ALUMINIUM	Mechanical honesty.
AMBIENT LIGHT	Guiding rather than decorating.
HAND-STITCHED LEATHER	Craftsmanship you can feel.

DESIGN NOTE
The best materials are not chosen to impress.
They are chosen to belong.

LUXURY IS NOT MEASURED BY COMPLEXITY,
BUT BY PRECISION.

LIGHTING SIGNATURE

LIGHT IS THE FIRST EMOTION A VEHICLE COMMUNICATES

FRONT IDENTITY

Inspired by the focused gaze of the original Pantera.

REAR PRESENCE

A continuous light blade expressing width and stability.

INTERIOR ATMOSPHERE

Ambient lighting designed to reduce visual fatigue.

WELCOME SEQUENCE

Light becomes the first interaction between driver and machine.

DESIGN NOTE

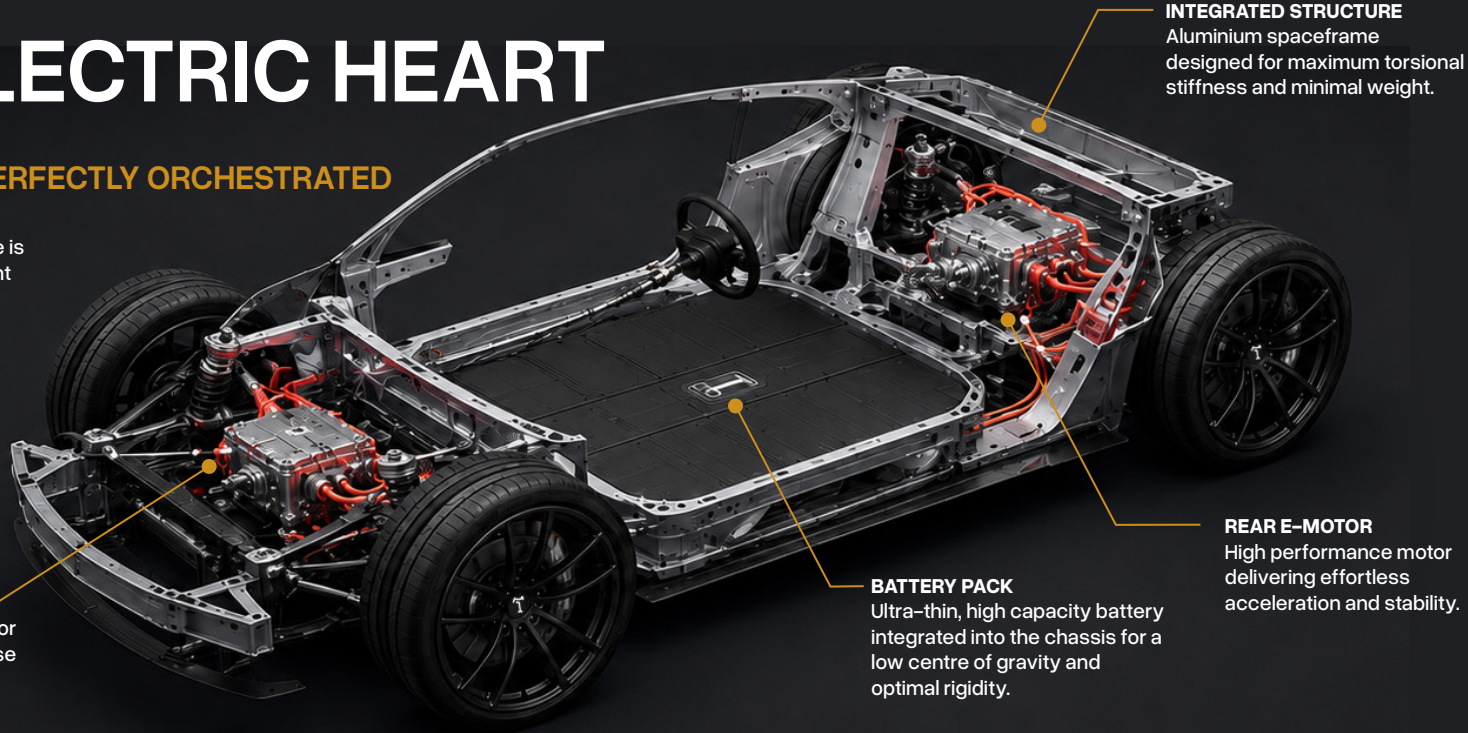

Light should never decorate the vehicle.
It should define its character.

WHEN DESIGN DISAPPEARS INTO
DARKNESS, IDENTITY REMAINS.

THE ELECTRIC HEART

PURE ENERGY. PERFECTLY ORCHESTRATED

The Pantera EV architecture is engineered to deliver instant performance with balance, precision and emotional connection.

FRONT E-MOTOR

High power density motor for instant response and precise control.

INTEGRATED STRUCTURE

Aluminium spaceframe designed for maximum torsional stiffness and minimal weight.

BATTERY PACK

Ultra-thin, high capacity battery integrated into the chassis for a low centre of gravity and optimal rigidity.

REAR E-MOTOR

High performance motor delivering effortless acceleration and stability.

The Electric Heart of the Pantera EV combines advanced technology with timeless engineering principles.

Every component has been strategically positioned to deliver exceptional performance and balance.

DUAL MOTOR AWD

Independent torque control for maximum traction and agility.

800V ARCHITECTURE

Enables ultra-fast charging and optimized efficiency.

BATTERY INTEGRATION

Structural battery pack enhances rigidity and safety.

WEIGHT DISTRIBUTION

49:51 front to rear for perfect dynamic balance.

THERMAL MANAGEMENT

Advanced cooling system ensures consistent performance.

Performance is not just about power. It is about harmony between all parts.

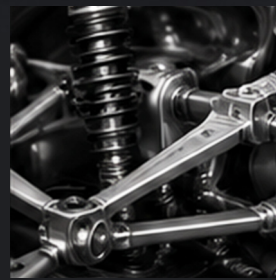

DESIGN NOTE

Technology should be invisible. Its impact should be unforgettable.

BATTERY TECHNOLOGY

High energy density cells with advanced thermal management and safety redundancy.

SUSPENSION

Aluminium double wishbone suspension tuned for precision and driver feedback.

POWER ELECTRONICS

Compact, lightweight inverters for superior efficiency and power delivery.

**ENGINEERED WITH INTENTION.
DRIVEN BY EMOTION.**

DRIVING DYNAMICS

FEEL THE ROAD. MASTER THE MOMENT

The Pantera EV is engineered to deliver an emotional and intuitive connection between driver, machine and road.

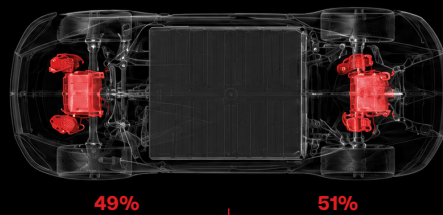

LOW CENTRE OF GRAVITY

The battery pack is fully integrated into the chassis floor, lowering the centre of gravity for exceptional stability and cornering performance.

IDEAL WEIGHT DISTRIBUTION

49:51 front to rear weight distribution delivers natural balance and predictable behaviour.

DRIVE MODES

Five calibrated personalities. One car, every road, every mood.

PANTERA	Maximum performance
SPORT	Dynamic and responsive
TOURING	Balanced and refined
WET	Optimised for low grip
RANGE	Maximum efficiency

Performance is not measured only in numbers. It is measured in confidence, control and connection.

Every dynamic element of the Pantera EV was tuned to deliver precision without compromise and emotion without limits.

PRECISE STEERING

Variable ratio steering for maximum feedback and accuracy.

ADAPTIVE SUSPENSION

Continuously adjusts damping to road conditions and driving style.

REGENERATIVE BRAKING

Intelligent energy recovery with natural brake feel and control.

TORQUE VECTORING

Independent torque control for superior traction and agility.

DYNAMIC STABILITY

Advanced control systems ensure confidence at every limit.

A true driver's car is not about speed. It is about how it makes you feel at any speed.

DESIGN NOTE

Technology should amplify emotion, not replace it.

CONTROLLED POWER. INTUITIVE RESPONSE. PURE CONNECTION.

DESIGN DNA

FOUR PERSPECTIVES.
ONE UNMISTAKKABLE IDENTITY.

EVERY ANGLE TELLS THE SAME STORY

DE TOMASO

PANTERA EV - CONCEPT BOOK

THE RETURN OF AN ICON

SOME LEGENDS DESERVE ANOTHER BEGINNING

DESIGNED FOR THE FUTURE. BUILT FROM HISTORY.

A PERSONAL REFLECTION

Some automobiles transcend generations.

Others become legends.

The De Tomaso Pantera belongs to an even rarer category: those that continue to inspire passion long after production has ended. From the early 1970s through the early 1990s, it represented a remarkable fusion of Italian design and uncompromising performance, securing its place among the true icons of automotive history.

This Concept Book was never intended to rewrite that history.

Quite the opposite.

It was created to pay tribute to it.

Designing this Pantera EV has been a genuine privilege. Every line, every surface, and every detail was born from a single question:

"What if the Pantera had been designed today, while remaining unmistakably true to its identity?"

The result is a personal interpretation, developed with profound respect for the original and guided by the belief that great design is not about nostalgia, but about carrying timeless ideas into the future.

If, while turning these pages, you found yourself imagining the return of the Pantera, even for just a moment, then this project has fulfilled its purpose.

Thank you for being part of this journey.
